

day two: due to faulting & greater resistance to erosion

Geology submerged sea Guadalupe.

3 & ½ hrs. 4 miles. An equation of time.
5 who calculated climbing limestone comprising more miles.

Capitan's horizontal faulting: Guadalupe landscape.

"The most striking feature is the thousand-foot high El Capitan, which can be seen from miles around. Early settlers used it as a landmark on the route through Guadalupe Pass."

Limestone.

Tiny cemented modern reefs.

Deposits.

Siltstones sandstones.

sandstones.

sandstones.

Middle time stretched for miles. A gallon of water. A peanut butter sandwich on whole wheat bread.

Mountain carrying charms at 8749.

(exposed reef lime-secreting marine sediments)

Highlands like canyons & grey.

Salt basins patched: cloud shadowing.

.

Sotol.

Ocotillo.

Sediment.

A peak of ladybugs.

A distance sensation.
